WHAT IS MOMCARE?

MOMCAREjail.org is a website that contains practical resources about **pregnancy opioid use disorder (OUD) care in jails.** MOMCARE provides jail leaders and staff with the tools to counsel patients and deliver **clinical care AND to implement systems** specifically for pregnant and postpartum patients with OUD—including access to methadone and buprenorphine in custody and at reentry. While MOMCARE is focused on pregnancy and OUD, there's a lot of useful general pregnancy information too! See this **1-pager** for a summary of the MOMCARE clinical and implementation content.

WHO IS THE SITE FOR?

MOMCARE is for anyone who works in a jail that houses females. Your jail is likely to see pregnant patients, even if it is not that often. And, we know that opioid use is common in pregnancy. This site is designed for jail correctional health care providers, security/custody officers, jail administrators, Sheriffs, social workers, behavioral health staff, reentry staff, or anyone else interacting with pregnant patients with OUD in jail. **Whether your jail sees 1 or 100 pregnant patients with OUD a year, MOMCARE is for you!**

KEY RESOURCES

momcarejail.org/resources/

- Initial Pregnancy & OUD Screening & Care at Jail Intake
- Custody Guidance
- Patient Education
- Safe Medications for Opioid Withdrawal in Pregnancy
- Pros & Cons of Buprenorphine vs. Methadone During Pregnancy
- Recognizing Urgent Maternal Warning Signs
- Recognizing Labor Signs
- Reentry Checklist for Pregnant & Postpartum Patients
- Communicating with Patients
- Patient Education Materials

HOW AND WHEN TO USE MOMCARE:

You can use MOMCARE in the moment when you have a pregnant or postpartum patient with OUD in front of you, or to learn more about key topics in advance of working with a patient. You can go to the MOMCARE website directly on a computer, phone or tablet, or even print out 1-pagers and factsheets. MOMCARE content can also be embedded into staff training and onboarding.
